

**Dear customers, business partners and friends,**

Articles from our Collection Books are generally available for many years or even decades.

Our Collection Book portfolio can be basically split into 3 categories:

- **Full use**  
All articles from these books are still available or can be produced.  
Most of these books are still available on stock and are shown on our website.
- **Potential use**  
The books might contain a few articles which are not available any longer. Besides that, they can be still used. The current article lists for each collection with detailed information about the discontinued articles can be downloaded on our website:  
<https://www.desima.com/desima-downloads-en/>
- **Discontinued**  
These books contain several articles which are discontinued or cannot be produced any longer. We recommend to replace them by new collections.

#### About Desima Collections

As many of you know, our backbone are the traditional Silver Desima Collection Books. The articles have a 4-digit code (like Mxxxx) and we keep an extensive stock of our best-selling articles to serve our customers well. A new production takes in average about 2-3 weeks.

During the years 2010-2015, we offered some alternative collection books with a brown or blue cover and an alternative Desima logo. These books (like Schloss Salem, Diamonds, Juwels, etc.) are not part of our standard portfolio anymore. They contain products with a special 5-digit article code which can be only produced to a limited extend and on demand. A new production takes about 3-6 weeks.

We recommend to focus on our traditional silver Desima collection books.

Please feel free to contact us in case you have any doubts or questions about the availability of our Textile Wallcoverings.

Yours sincerely

*Desima Team*
